

# Sea Colony Aqua Sports

Maryland's largest and oldest PADI 5 Star Training Facility

## Enriched Air Nitrox Scuba Program 2020

### Description

The PADI Enriched Air Diver course is PADI's most popular specialty scuba course. Why? Because scuba diving with enriched air nitrox gives you more no decompression time, especially on repetitive scuba dives. If staying down longer and getting back in the water sooner sounds appealing, then don't hesitate to become an enriched air diver.

### Prerequisites

To enroll in a PADI Enriched Air Nitrox course, you must be 12 years old or older and already hold an Open Water Diver certification.

### What's Included

For current pricing or schedule, please call us or visit our website. The price includes an academic session that contains a lecture, discussion of knowledge reviews, a final exam and a hands-on workshop of how to analyze the gas in a nitrox tank. Each student will be provided with a Manual. Upon satisfactory completion of the final exam, you will be issued a certification card.

### Personal Equipment

Divers enrolled in the nitrox course will learn that for practical reasons, diving nitrox with a dive computer is essential. Although it is possible to use dive tables, the benefits of nitrox are best realized with a dive computer. During the course, divers with a dive computer will be shown how to setup and monitor their computer.

### Certification

This is a class-room only course. No open water dives are required. Upon completion of the academic session a certification card will be issued.
